

Angie Aguilar, she/her/hers

Class of 2024; biology & global health

Why Northwestern?

I chose Northwestern because it offered everything I wanted in a school, including smaller class sizes and numerous resources for first-generation, low-income students. I also really loved its location on Lake Michigan. Coming from LA, I was really excited about the beaches on campus!

Favorite Spot on Campus:

Norris University Center

Come to me for:

- Biology
- Chemistry

Why did you become a counselor?

I decided to become a counselor because Bio&ChemEXCEL holds a special place in my heart. I've always wanted to give back to a program that not only introduced me to some of my closest friends but also significantly prepared me for my first year at Northwestern. I remember the head counselor during my time as a student; her support was invaluable. I truly hope to offer the same level of encouragement and guidance to the incoming Excel students!
