

Sarah Opoku, she/her

Class of 2026

Physical Chemistry

Why Northwestern?

I chose Northwestern because I studied theater and dance in high school, but knew I wanted to go into science in college. During my tours at Northwestern, they really preached study in many opposing subjects so I felt drawn to that ability to explore any and all of my interests.

Favorite Spot on Campus:

Tech atriums, specifically the one on the third floor!

Come to me for:

- Intramural sports
- Shopping locally (second-hand!)

Why did you become a counselor?

Having the community of students, staff, and counselors from the program on campus has provided me with countless opportunities to further my knowledge, as well as support my classmates. I decided to become a counselor to help establish similar experiences for incoming students as they transition into this institution.
