

Sarah Opoku, she/her/hers

Class of 2026; chemistry

Why Northwestern?

As someone with a strong love for learning, I wanted to go to a school where the possibilities for my education were limitless but academic excellence was still exhibited. For me, Northwestern was that place.

Favorite Arch Memory:

It's hard to pick just one but my favorite memories were definitely just any late night walk to grab food with my friends (Especially Dominoes)!!!

Come to me for:

- Chemistry
- Math

Why did you become a counselor?

Having the community of students, staff, and counselors from the program on campus has provided me with countless opportunities to further my knowledge, as well as support my classmates. I decided to become a counselor so that I could help establish similar experiences for incoming students as they transition into this institution.
