

Hanna Rodriguez, she/her/hers

Class of 2026; neuroscience & global health

## **Favorite Arch memory?**

One of my favorite memories from Bio&Chem excel was one week into the program, my current roommate and I realized we had both selected random assignment and decided to be roommates for the year then and there. The rest was history and we have now been roommates and great friends for 2 years!

## **Favorite Spot on Campus:**

Pancoe because there is a cafe with great food and it has large windows to get some sun.

## **Come to me for:**

- Calculus
- Spanish
- Biology
- Organizational tools

## **Why did you become a counselor?**

I decided to become a counselor because I had a great experience when I did it my freshman year and have truly found a community within the programs I have participated in. As such, I wanted to help give back and provide guidance which helped me throughout my time at NU. In addition I was a PA last year and had a great time working with the incoming class and both being able to help and learn from the students that were in my group.
