Class of 2027

Chemistry

## Why Northwestern?

From the moment I stepped on campus, Northwestern felt like the place for me! The college town is great for students and the ability to travel downtown for Chicago culture really drew me to Northwestern. The institution's encouragement of studies beyond undergraduate also appealed to me as I've always expected to pursue graduate school, and I hope to participate in the Chemistry Department's BA/MS program.

## Favorite Spot on Campus:

Random bench near Deering Lawn to study, people-watch, and enjoy the changing seasons!

## Come to me for:

- Topics in Chemistry and Biology
- Reading and Writing (book recs, essays)
- Independent Research
- All Things Fashion

## Why did you become a counselor?

From the moment I finished the Bridge program, I knew I wanted to come back and serve as a counselor. This program brought me my best friends AND my own sense of who I wanted to be here at Northwestern. Providing such an experience for other incoming students and encouraging them to grow into themselves authentically is something that I truly value and hope to foster in Bridge participants.
